

ACTIC 10% EC

Emulsifiable Concentrate (EC)

ACTIC 10% EC is a non-systemic insecticide with contact and stomach action. It is used to control a wide range of insects, especially Lepidoptera, Coleoptera, Diptera, Hemiptera, and other classes. It is used as a public health insecticide to control flies and mosquitoes, cockroaches, houseflies and other insect pests.

COMPOSITION

Each liter contains: Cypermethrin100 g/Lt

USES & RECOMMENDATION

Main insect pests that can be controlled

ACTIC 10%EC is suitable for treatments:

- inside production sites, residential and recreation buildings.
- outdoors, even in the presence of vegetation, at recommended rates.

Usage rates and directions for use:

ACTIC 10%EC can be used at rates going from 0.15% to 1.0% (15 to 100 ml product in 10 litres water). However, as with any insecticide, usage rates are connected to the type of insect pest to be controlled, to the environment to be treated, to the presence or absence of people, animals, vegetation, to temperature, humidity, and wind speed. The following chart gives a few possible dilutions based on practice.

AL-Burj Agrivet

Truth of Quality

USES & RECOMMENDATION

TYPE OF PEST APPLICATION AREA	APPLICATIONS ON ADULT MOSQUITOES	APPLICATIONS ON ADULT FLIES	APPLICATIONS ON COCKROACHES
Indoor Application	50 ml/20 Lt water		
Space applications outdoors			
Surface applications outdoor			

COMPATIBILITY

Compatible with most pesticides, expect alkaline compounds.
