

RAPIDO PEST CONTROL

Bird Gel Repellent Rapido- BGR

Bird Gel is a product that is based on a scent release control technology by means of micro encapsulation and formulation technology.

It is stable in rain and extreme weather conditions giving it a lifespan of 2 years.

Our Bird Gel is a multi-sensory type - meaning visual, olfactory, taste and touch which works simultaneously to stimulate the birds to fly away.

Prior to fixing the Bird Gel with super adhesive, the surface needs to be cleaned from any dirt / dust and nests.

Rapido Bird Gel has chemical substances that are harmless to birds, however, they see it as humans would see a raging fire and avoid the area.
