

EDGE®

Developed to be the most effective glueboard flykiller on the market, Edge® is designed around patented* glueboard technology to catch significantly more flying insects than traditional glueboards.

As the glueboard is inserted into the flykiller it self-folds at the desired points, creating a unique form around high efficacy Synergetic® UV tubes. This unique design forms edges, proven to be more attractive to flies, maximises useful UV light output, and creates **a 30% larger glue area than traditional glueboards, creating a staggering 31.5% increase on a normal catch rate!**

The unique glueboard form provides three features shown to better catch flying insects:

1. The glueboard forms edges, proven to be more attractive to flies
2. 30% larger glue area than traditional 'flat' glueboards
3. The glue area is equidistant from the UV tubes, maximising the useful glue area

* Patent pending

OFFERING A 31.5% INCREASE IN CATCH RATE

FEATURES

- Unique patented* glueboard technology
- Catches 31.5% more flies than traditional glueboards
- Swing down front guard allows simple and quick servicing, with full access to consumable parts
- Patented dual wavelength Synergetic® technology for an increased catch
- Service friendly features for simple and quick maintenance
- Simple wall, ceiling or desk mounting
- Independently tested and certified to RoHS and all relevant European standards
- Contemporary British design

* Patent pending

PRODUCT CODE

ZF105

DESCRIPTION

Edge®, 30 watt, Stainless

DIMENSIONS (MM) H x W x D

380 x 570 x 110

COVERAGE (M²)

120

TUBES

2 x TGX15-18

GLUEBOARDS

1 x INF198

WEIGHT (KG)

5.5

ROOM COVERAGE

120 m²

APPLICATION

- Commercial Kitchen
- + Industrial Food Preparation
- + Front of House
