

Outdoor Re-useable Fly Trap Rapido-ODRFT

- Flies can be a real nuisance at any time of year, but they are particularly so during the summer months when they invade our homes, farms, smallholdings and stables.
Now at last, there is a safe and effective way to trap and deal with them – Red Top Fly Catcher.
A unique and safe product, Red Top Fly Catcher are the ultimate fly trap. They are low-cost, non-toxic, simple-to-use and chemical-free.
- They are hung outdoors in your garden, approx. 15M from your home in a nice sunny position, whilst on farms they can be placed around your livestock and poultry sheds or stables.
Red Top Fly Catcher need some sunlight and warmth to get going and once set up will begin working within a few days and last up to 12 weeks. They use a non-poisonous, ecologically safe protein lure to attract the flies via a turret into a three-litre trap.
